

SARAH DAVISON BDES MDIA

I have always been inspired by beautiful residential architecture and interiors, and their influence on how it feels to live inside them. Since 1998, when I started my own practice, my focus has always been on creating harmonious, life-enhancing interiors.

Each client and the architecture of their home are a unique combination, so the designs we produce are also individual, rather than reflecting one particular style.

In the same way that a good black suit remains in fashion, interiors can be timeless if they are well proportioned, employ good materials and suit the people they are built for.

Beauty, quality and functionality are my long-standing design principles.

Strong, highly functional planning is always our starting point on any project. Well laid out, generous spaces and natural light are key to the overall quality of a space, given that a strong base will make everything within it function smoothly and look beautiful.

Quality rather than quantity guides me in selecting materials, fittings, furniture and artwork. Good quality materials and workmanship give longevity and aesthetic appeal, and save time, energy and cost in the long run.

Beauty is always my prime goal... For its ability to ease the mind, lift the spirit, and for the pure, lasting pleasure it brings.

CREATING LUXURY IN INTERIORS

SEMINAR 5

FRIDAY 3 FEBRUARY 2012 - 10.30AM - 11.30AM

PANEL DISCUSSION FEATURING;

MELINDA ASHTON TURNER (AUS) + CHELSEA HING (AUS) + SARAH DAVISON (AUS)

[BOOK NOW »](#)

TICKETS \$44 EACH (INC GST)

Enjoy a thought provoking panel discussion on luxury. Melinda, Sarah & Chelsea will give their individual opinions on what luxury means to them, whilst giving tips and advice on how to create luxury in interiors by using beautiful objects and materials that are luxurious to the touch and the eye. Learn how to create luxury in interiors by understanding that luxury is relative to the individual and can be achieved in the same space on many different levels.
